

Stokholm, April 13th 2000

From: Anders HAGGLUND
Head of Electrical Department
Swedish Civil Aviation Authority
STOCKHOLM BROMMA Airport

This is to hereby certify that since October 1999 our STOCKHOLM BROMMA Airport has been equipped with the Taxiway Edge Leds Lighting system manufactured by F. B. TECHNOLOGY.

With 210 units installed on the airport, we have experienced a much reduced operating cost and an improved maintenance schedule. The estimated economy realised since installation of the LLS six months ago is above 6,000 EURO per month.

Since LLS from F.B. TECHNOLOGY is energy saving, environment friendly and very long lasting, we can only recommend ist installation on any airport.

Regards,

Anders Hägglund
